1 Unnumbered display equations

Single-column text with an unnumbered display formula:

$$E = mc^2$$

and a numbered one,

$$\frac{\partial \rho}{\partial t} + \nabla \cdot (\rho \mathbf{v}) = 0. \tag{1}$$

Also an inline formula $a_i^2 + b_i^2 = c_i^2$ with $p < 0.01$ and a value of 3.5×10^{-4} m/s.

Table 1: Top-captioned table in a single-column layout.

Item	Value	Unit
alpha	1.25	mm
beta	0.75	mm
